

## Plan Ahead for the Future with **ESC's Annual Training Contract**

In an ever-changing industry, ESC recognizes the need to provide ongoing, up-to-date training for your employees. Between training new employees and continuing education courses, we realize these unforeseen costs can impact your budget. ESC's Annual Training Contract eliminates unexpected costs associated with the training and re-training of your employees by providing unlimited training opportunities for one fixed, annual price.

The Annual Training Contract provides you with unlimited\* seats at any of the public classes, workshops or webinars provided by ESC|University. Priced on a per site basis (i.e. plant, corporate location), the Annual Training Contract gives you the flexibility to train as many employees as necessary each year.

ESC|University offers a diverse collection of instructor-led learning opportunities custom designed to create awareness on emerging industry issues and provide up-to-date working knowledge of ESC products, industry technology, regulations and much more! Classes and workshops are routinely held in cities through the country and at ESC's corporate office in Knoxville, Tennessee. Whether training is needed for a new employee or for continuing education, ESCU's variety of classes, workshops and webinars are available to meet your specific needs.

*\* limited to available seats at the time of registration*

## ESC | University Learning Opportunities

### ESCU Classes

ESCU classes are training sessions conducted in a small classroom setting with approximately 10 participants. Classes focus primarily on foundational topics pertaining to our software, hardware and regulations. Classes typically include hands-on activities designed to build the skills necessary to perform specific job functions.

- CEMS New User with ESC|StackVision
- Part 60/75 Regulations
- QuickStart to ESC|StackVision
- ESC|StackVision SQL Server Database Administration
- And more!

### ESCU Workshops

ESCU workshops are one-day training sessions conducted in a larger group setting with approximately 25 to 30 participants. Attendees have the opportunity to discuss relevant topics with peers. Workshops focus on communicating knowledge and generating awareness regarding the potential impact of current hot issues. Our experienced instructors provide you with the latest information on specific topics. As this information is constantly being updated, our workshop content is continually evolving. Participants can revisit these workshops multiple times for the most current information.

- Using ECMPS
- Understanding Permit Requirements
- ESC|StackVision Condensed Configuration
- PADEP Revision 8 Regulations
- And more!

### ESCU Webinars/Teleconferences

Designed to provide up-to-date working knowledge of ESC products, industry technology and regulations from the convenience of an office, webinars eliminate budgetary constraints for traveling.

- Using ESC|StackVision Data Management Tool
- Understanding Permit Requirements
- Improving Server Performance
- Part 75 Initial Certification
- And more!
