

ESC™

FLEETVISION™ ADVANTAGE

For years, ESC has offered comprehensive plans designed to protect your CEMS Data Acquisition System (DAS) from unforeseen increases in compliance costs. It's time to extend that same service to ESC|FleetVision customers.

You have taken the necessary steps to protect your fleet from the risks associated with manual data aggregation by purchasing FleetVision. With ESC|FleetVision Advantage, you can protect your investment from incremental cost increases resulting from unforeseen changes in technology, compliance and security requirements, and business needs.

Designed to help you manage your risk and control expenses, FleetVision Advantage provides you with access to product updates and technical Support service, ensuring that you maximize the lifetime of your investment. With this service, you don't have to worry about maintaining the connections between FleetVision and other systems as this program guarantees that FleetVision delivers a consistent interface even as StackVision, XML EDR schema and FleetVision evolve. FleetVision Advantage customers can rest assured that these connections will continue to function.

In an industry where real-time information is vital to decision making, you cannot afford a lapse in your data. FleetVision Advantage guarantees a consistent interface for aggregating data from your StackVision systems and Non-ESC DAS, transferring this data to other critical business systems such as your Environmental Management Information System.

Give your company the peace of mind that comes with ESC|FleetVision Advantage!

Software Updates

- **Connection Maintenance** – Provides customers with periodic updates to ESC|FleetVision, ensuring that the connections to their ESC|StackVision systems and Non-ESC DAS will continue to function even as these products evolve.
- **Feature Enhancements** – Provides customers with periodic updates to ESC|FleetVision in order to enhance existing features and improve the software's usefulness.
- **Defect Corrections** – Provides customers with periodic updates to ESC|FleetVision in order to correct known defects.

Technical Support

- **Online Technical Support Tools** – Customers have access to online technical support tools including the Customer Access Portal (CAP), ESC Online Community, and access to software updates, product documentation, product release notes and more!
- **Technical Support Services** – Customers benefit from access to our top-rated Support team during normal business hours in order to assist them in diagnosing and resolving difficulties.
